

## Project Initialization and Planning Phase

|                      |                                                     |
|----------------------|-----------------------------------------------------|
| <b>Date</b>          | 08 July 2026                                        |
| <b>Team ID</b>       | XXXXXX                                              |
| <b>Project Name</b>  | EduGenie – Google Gemini Powered Learning Assistant |
| <b>Maximum marks</b> | 3 Marks                                             |

### Step 1: Submission Checklist

| S.NO | ITEM TO SUBMIT                                            | SUBMITTED (YES / NO/ NA) |
|------|-----------------------------------------------------------|--------------------------|
| 1    | Complete source code (all files and folders)              | Yes                      |
| 2    | README / Setup Guide (instructions to run the project)    | Yes                      |
| 3    | requirements.txt / package.json / dependency file         | Yes                      |
| 4    | Database schema / seed files (if applicable)              | Yes                      |
| 5    | Environment configuration file (.env.example or similar)  | Yes                      |
| 6    | Deployed application URL (if hosted)                      | Yes                      |
| 7    | Executable binary (if applicable for mobile/desktop apps) | NA                       |
| 8    | Dockerfile / Containerization config (if applicable)      | Yes                      |
| 9    | Test files and test results                               | Yes                      |
| 10   | Demo video or walkthrough (if required)                   | Yes                      |

```
/EduGenie-root
├── /backend # FastAPI application server
│   ├── /app # Main backend application package
│   │   ├── /api # API routes and endpoint handlers
│   │   ├── /models # Database models and schemas
│   │   ├── /services # Business logic and AI services
│   │   ├── /database # Database connection and configuration
│   │   ├── /auth # Authentication and authorization
│   │   └── main.py # Core FastAPI application entrypoint
│   └── /frontend # Frontend application files
│       ├── /templates # HTML templates and pages
│       ├── /static # Static assets directory
│       ├── /css # Styling files

├── .env.example # Environment variables template
└── run.py # Application startup script
```

### Step 3: Deployment / Access Details

| Field      | Details                           |
|------------|-----------------------------------|
| Hosted URL | Your deployed URL                 |
| Demo Login | student@example.com / password123 |
| Platform   | Render / Railway / Vercel         |
| Repository | Your GitHub Repository            |
| Demo Video | Google Drive / YouTube Link       |

### Step 4: Run Instructions

1. Clone the repository.
2. Open terminal.
3. Install dependencies: `pip install -r requirements.txt`
4. Configure .env: `GEMINI_API_KEY=YOUR_API_KEY`
5. Start FastAPI: `uvicorn backend.app.main:app --reload`
6. Open: `http://127.0.0.1:8000`
7. Login and access all EduGenie AI features.

### Step 5: Known Issues / Limitations

| S.No | Issue                                         | Status               |
|------|-----------------------------------------------|----------------------|
| 1    | Gemini API latency during heavy traffic       | Minor                |
| 2    | Internet connection required for AI responses | Expected             |
| 3    | Large prompts increase response time          | Optimization planned |
